HONOR AWARDS CEREMONY

Wednesday,
May 18, 1983

Foreword

American agriculture is the most efficient in the world. Our agricultural efficiency enables 3 percent of the Nation's people to provide the food and fiber for the other 97 percent—and still have enough left over to be the world's largest exporter of these products.

This enables the farm sector to lead the way in reducing our foreign trade deficits.

U.S. agricultural exports consistently play a major role in offsetting a substantial portion of the losses generated from nonagricultural trade.

Agricultural productivity per hour is increasing at a rate that is more than three times greater than the increase in the business sector. Much of the credit for that efficiency proudly belongs to the people in USDA.

This year's recipients of the Department's highest honor awards personify the spirit that has traditionally characterized our agricultural effort . . . an effort that frees so many of our citizens to produce other goods, perform other services, and to create the affluence that is shared by the Nation's people.

I know every employee in this Department joins me in congratulating the 1983 award winners and in thanking them for an outstanding performance.

A handwritten signature in black ink that reads "John R. Block". The signature is fluid and cursive, with the first and last names being more prominent than the middle initial.
